PEER SUPPORT

Enthusiastic Year 10 students are the peer support leaders, who provided an exciting introduction into St Clair High. They provided a blend of informative and interactive workshops which allowed the new Year 7 students to get to know one another and also make contact with an older student who they could turn to for support if needed. Students learnt how to read their timetables and interactive with one another as safe, respectful learners with a focus on their personal best.

In Week 10, Term 2 the students will come together again for a drama performance and gala day with a focus on Anti-bullying.

YEAR 7 SWIMMING AND LIFESAVING SCHOOL

All Year 7 students will be involved in a swimming and lifesaving school in Term 4, which is an integral part of the water safety component of the PDHPE syllabus. The school will cater to all levels of swimming ability from beginner to advanced and will have a strong focus on stroke technique and correction, water awareness, safety and lifesaving techniques and basic resuscitation and emergency care. This will be delivered through a range of both practical and theory based activities. (Students will be assessed by supervising teachers and be allocated a group in alignment with ability.) Students will have the opportunity to achieve a BRONZE AWARD in swimming and lifesaving endorsed by the Royal Lifesaving Society.

All Year 7 students are expected to attend and actively participate as the content completed during the school will form part of their final assessment for this school term. Parental support is requested to ensure the ongoing success of this school.
